

Welcome to the Future of Digital Imaging

The New P-DR 715

P-DR 715

20/20 Imaging is bringing 20/20 vision to your practice. Our new **DR technology** is a giant leap forward, bringing the future of digital imaging to your doorstep. 20/20 Imaging was the first to introduce digital imaging to podiatry, fully automatic extremity dedicated CR, and now the very first to introduce dedicated DR to podiatry!

The P-DR 715 upgrades the long time industry standard favorite mid-base with the patented "SR" series tilting bilateral tube head and a lower base to improve exam efficiency. Couple that with our unique CCD sensor design that allows for a 22-48% larger imaging surface than current analog (film) or computed radiography (CR) processing.

Experience the enormous clinical and business benefits of direct radiography to your podiatry practice with the P-DR 715. Finally, small steps in technology deliver a giant leap in patient care.

P-DR 715

FEATURES AND BENEFITS

- **Patented Tilt Head System** (eliminates need to rotate patient for AP views)
- **6 inch high base** (improved height for patient use)
- Patient support rail allows access from side or front
- 29" SID AP/Oblique view
- 36" SID Lateral view
- "SR" series proprietary tube
- Low voltage exposure switch
- **May qualify for ADA TAX Credit**

SENSOR SPECIFICATIONS

- NO CASSETTES Eliminate "wear & tear" associated with CR plates
- Maximum Throughput > 100 images processed per hour
- Sensor Type CCD
- Active Image Matrix 11" x 14" (22-48% larger than conventional film or CR plate)
- Sensor Weight 12.75 lbs.
- Power Supply 100AC
- Environmental Conditions Temp: 59-95 F/15-35 C, Humidity: 35-75% RH

SPECTACLE SOFTWARE

- Innovative "Point, Click, & View" Process
- Cleaner Artifact-Free Data
- Advanced DICOM Image Processing
- 20/20 Image Management Software
- iSPECTACLE Web-Based Software (optional)

INCLUDES

- Installation and In-Service Applications
- Full 12 Month Parts & Labor Warranty
- 24/7 Technical Support
